Cause of Non-Compliance

On Fairfield at 202+00 RT, turbid storm water runoff was observed leaving the project site at MSE Wall "C"

The runoff source is the parkway on the west side of Fairfield through Manhole 61B. The area is being final shaped for topsoil by the Contractors. The runoff was generated by a 2.5" overnight rainfall event over the course of 10 to 12 hours.

The ION occurred in the morning hours of 6/11/14.

Actions Taken to Prevent Any Further Non-Compliance

The Contractor installed inlet protection around MH 61B and deployed triangular ditch checks uphill of the manhole.

The temporary Type 8 Open Grate Lid on the manhole was swapped out for a Type 1 Frame & Closed Lid.

Final stabilization with topsoil, seed, and erosion control blanket is scheduled to resume later this week when the subgrade is dry enough for equipment access.

Environmental Impact Resulting From the Non-Compliance

Turbid storm water runoff with fine sediment and NTU readings over 100 reached Wetland Site #12 along Fairfield.

Actions Taken to Reduce the Environmental Impact Resulting From the Non-Compliance

The Contractors were already in the process of final shaping, placing topsoil, seed, and blanket.

Those items will continue when the site is dry enough for equipment to re-enter.

Triangular ditch checks have been placed and inlet protection will be deployed within 24 hours.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony. (415 ILCS 5/44(h))
